

Accessories

Accessories are useful items that complement the product line. Some pieces are designed to make standard blocks more versatile and others are small pieces that fill a special need.

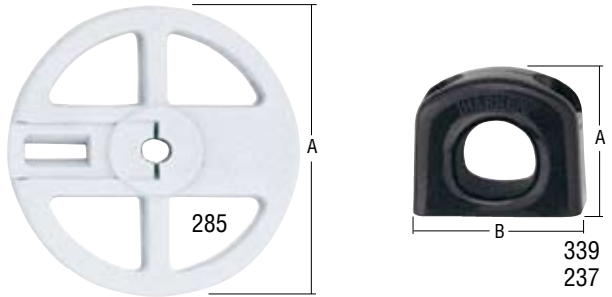

Handhold

The 062 handhold is popular on boats like Solings and scows to help hiking crew re-enter the boat. It can also be used as a handle for engine covers, etc. It has drain holes.

Bullseye Fairlead

Use the 237 and 339 where there is little deflection in the line such as when routing a spinnaker pole foreguy aft along the cabin house.

Sail Chafe Protectors

Use 285 to ease genoas over lifelines or past shrouds and to help large roach mainsails clear backstays.

Prefeeder

Use 947 with racing foils or with furling systems.

Dinghy Clew Hook

The 433 and 394 Dinghy Clew Hooks are designed for Lasers[®] and other loose-footed dinghies. It installs permanently on the boom and allows you to instantly attach your sail in high wind and waves.
